

David J. Thompson Mailing Corporation Equipment List

Data Processing and Laser Personalization

Communications

We offer high-speed FTP capabilities to our customers across a secured dedicated T3 line. Utilizing this option for transferring your data files to us saves valuable time and money by eliminating costly overnight service charges as well as allowing us to begin work a day sooner.

Processing

| * LACS Link | * Label Studio |
| * ACE | |

Laser Personalization Software

At Thompson Mailing we use Printnet Software, from GMC. Printnet is a highly automated document design/letter generator. It has a WYSIWYG user interface that eliminates "programming". Printnet's scripting offers flexible automated design options, soft proofing with live data and the live pre-printed form right on the screen.

Laser Personalization Hardware

- 7 Pagestream 466 printing systems
- 2 Pagestream 530 printing systems
- The above includes:
 - 3 Pagestream 932 duplex printing systems
